AGROINSUMOS SPECIFICATIONS

TYPE OF AGROINSUMO: Foliar fertilizer			
SYNONYMOUS: Plant nutrient		REGISTERED BUSINESS NAME: Lapiquel Zinc	
FORMULATION: Liquid	FORMULATION pH: 6.0	COLOR: Black	WATER SOLUBILITY: Soluble
PERCENTUAL COMPOSITION: Lapiquel Zinc % Zinc..... 8 Thinners and conditioners 92.00		MAIN COMPOUNDS OF THE FORMULATION: Primary nutrients	
		CHEMICAL FAMILY: Does not apply	
		CHEMICAL FORMULA: Does not apply	
<p>ACTION MODE: Lapiquel Zinc It is a formulation of Zinc complexed by natural organic agents, which give stability to the product in extreme conditions. This complex facilitates the penetration and release of nutrients in the plant. It is a fertilizer of high zinc solubility. With this formulation the Zinc contribution necessary for the biosynthesis of chlorophyll and indoleacetic acid is made, in the same way, this element is necessary for being an essential component and activator of numerous enzymes, indispensable in the synthesis of proteins due to its structural participation in the ribosomes</p>			
TOXICOLOGICAL CATEGORY: IV: Slightly Toxic	RESIDUALITY: No es Residual.	OFFICIAL REGISTER: RACO-3071/VI/94 - Indeterminate term	
<p>ACTION MODE: Lapiquel Zinc It is a formulation of Zinc complexed by natural organic agents, which give stability to the product in extreme conditions.
