

TRAK

Insecticide, ticks and / or acaricide external use suspension

REG.RSCO-PEC-INAC-0179-315-060-013

FORMULA

PERCENTAGE COMPOSITION ACTIVE INGREDIENT	% IN WEIGHT
Amitraz: (N - [2,4-dimethylphenyl] -N - [[2,4-dimethylphenyl]] -imino] methyl] -N-methylmethaneimidamide	12.5%
(Equivalent to 125 g of i.a./L 20°C) Inert ingredients Emulsifier, surfactant, stabilizer and solvent	87.5%
Total	100%

PRESENTATION

Bottle with 40 mL

INDICATIONS

For treatment and control of external parasites, such as fleas, lice, mites and ticks.

DOSE

Dogs:

Prepare the treatment by mixing 2-4 mL of TRAK per liter of water in a bucket.

Thoroughly soak the dog using a sponge or brush (always use gloves).

Do not rinse or dry the animal, allow it to dry outdoors.

In cases of severe infestation it is recommended to give 2 to 3 baths with an interval of 7 to 10 days.
