

Dermoscent BIO BALM®

REG. SAGARPA: Q-2083-174

Repair and care for cracked plantar bearings, truffle and decubitus calluses. Helps in the healing of superficial wounds, irritation and dry skin in dogs.

FORMULA

Ecological formula, without petrolatum, based on soy and palm oil and Cajeput essential oil, active ingredients and excipients 100% natural, without preservatives.

PRESENTATION

Jar with 50 mL.

INDICATIONS

In hyperkeratosis by lateral decubitus (elbow callus), to protect the plantar bearings dry and subjected to intense work, to soften the hyperkeratosis of the nose truffle and for alopecias and hyperkeratosis skin scars.

ACTIONS

- Protects the wear of plantar bearings.
- Nourishes and lubricates the cracks of the skin accelerating its regeneration.
- Helps to repair traumatic abrasions in cars.
- Hydrates and lubricates dry skin areas.

DOSAGE AND ROUTE OF ADMINISTRATION

It is recommended to apply on clean and dry skin. Apply it several times a day.

The daily application is highly recommended during periods of intense physical activity of the animal.
