

Dectiver® Premix

Ivermectin premix
REG. SAGARPA Q-2083-064

FORMULA

Each 100 g contains: Ivermectin 200 mg Vehicle cbp 100 g

INDICATIONS

For the treatment and control of internal parasites of pigs, such as infestations by Gastrointestinal, pulmonary and renal nematodes, both in their larval and adult phases. Is adjuvant in the control of infestations by external parasites such as chewing lice and mites of scabies.

USE

Pigs

DOSE

The recommended level of Ivermectin is 100 mcg / kg of body weight per day and for 7 days consecutive, for which the dosage of Dectiver ® Premix should be as follows:

PIGS OF UP TO 40 kg: Add 1 kg of Dectiver ® Premix per ton of feed for 7 days.

PIGS OF 40 TO 100 kg: Add 1.2 Kg of Dectiver ® Premix per ton of feed for 7 days.

REPRODUCERS AND STALLIONS

Because the feeding is restricted depending on the stage of the reproductive cycle, it will be necessary to calculate the amount of Dectiver ® Premix that must be added by ton of food and that should be administered continuously for 7 days. To calculate the dose per ton the following formula is used: Average body weight / daily feed intake / 20 = kg of Dectiver® Premix / ton.

Examples:

Average weight Kg	Daily consumption of food kg	Kg of Dectiver Premix per ton. From food
150	2.0	3.750
	2.5	3.000
	3.0	2.500
200	2.0	5.000
	2.5	4.000
	3.0	3.333
250	2.0	6.250
	2.5	5.000
	3.0	4.166

ROUTE OF ADMINISTRATION

Oral mixed with the finished food.
